**:: Your Options are Infinite ::**

# Your Options are Infinite

**Liquid Metal Specialist Finishes are decorative sprayable liquid metal coatings which allows you to transform nearly any material to give the impression that it is made of solid metal.**

Designed for professional use incorporating a blend of specifically shaped metal particles which are then combined with a unique binder which allows us to create one of the toughest liquid metal coatings available.

Various binders are available to assist you with getting the solution you require. Whether you're creating a decorative metal coating for internal use, a robust weather resistant coating or you require a flexible coating, we have the solution.

A huge range of surfaces and materials which can be coated include, sheet metals, wood, plaster, MDF, plasterboard, polystyrene, plastic, paper, glass and even concrete.

# Frequently Asked Questions

## Is It Paint?

No, it's actually a cold sprayable metal composite which consists of real metal.

## Is It Flexible?

Yes, it can be applied to various flexible surfaces.

## Can It Be Used Outdoors?

Yes, if the correct substrate is used which also gives many years lifespan.

## Is there a limit on thickness?

No, you tell us the thickness you require.

## Does the metal paint conduct electricity?

No, due to being embedded in a polymer resin, their conductive properties are limited. We do advise caution and also advise not to use the products in an electrical environment.
